

SUNSPARK INDUSTRIES

CASTED WITH **PRECISION GUN METAL COMPONENTS**

We believe in combining modern technology with traditional craftsmanship to deliver durable, efficient, and cost-effective solutions. Our commitment to continuous improvement, sustainable practices, and customer-centric service positions us as a reliable partner for all your casting requirements.

VISION

To be a globally recognized leader in non-ferrous foundry and precision engineering, delivering world-class brass, bronze, and gunmetal components that power industries with reliability, innovation, and sustainability.

MISSION

To deliver high-quality non-ferrous castings and components that meet the evolving needs of industries worldwide, through innovation, precision, and integrity.

Our Strengths :

- ISO-Standard Quality System
- Skilled Foundry Team & Engineers
- Custom Design & Material Selection
- On-Time Delivery Commitments

Company Overview :

Sunsspark industries is a leading non-ferrous foundry specializing in the manufacturing of gunmetal, brass, and bronze castings. With years of experience in precision metal casting and machining, we have built a strong reputation for delivering high-quality pump part valve components, and custom-engineered products to clients across diverse industrial sectors.

Our Capabilities :

We use precision sand and centrifugal casting with temperature-controlled furnaces and advanced molding systems for consistent, high-quality results. Techniques, supported by temperature-controlled furnaces and modern molding systems, ensuring flawless finishes and long-term performance. Our facilities are designed for custom casting, machining, and strict quality inspection enabling full control from design to dispatch.

Our Expertise :

At sunsspark industries, we combine traditional foundry craftsmanship with modern production technology to deliver durable and precisely engineered components. Our in-house facilities are equipped to handle the complete process from pattern making, casting, machining, and finishing ensuring superior quality control at every stage.

Core Values :

Quality excellence: We are committed to producing castings and components that meet the highest standards of accuracy, strength, and finish.

Integrity: We conduct our business with honesty, transparency, and fairness, building trust with our clients and partners.

Innovation: We embrace technology and creativity to improve manufacturing efficiency and develop better, more reliable products.

Customer Commitment: Our customers are at the heart of everything we do. We strive to deliver solutions tailored to their unique needs.

Sustainability: We believe in responsible growth by optimizing resource use and adopting eco-friendly practices in our foundry operations.

Teamwork: Our strength lies in collaboration working together to achieve common goals with professionalism and mutual respect.

Name of the Machine	Technical Specifications	Qty
Induction Furnace	Inductotherm 150 KW Furnace with 100 KG Capacity.	1
Centrifugal Die Casting	Horizontal type, Maximum swing 1200mm.	1
Intensive Sand Mixer	Vijay Engg, Capacity 250Kg for No bake & Green sand.	2
Fettling Equipment's	Pneumatic Point/angular grinders, Chippers.	Sets
Air Compressor	Asian make Compressor Model GA 25 Hp.	1
Cooling	Cooling tower Model PHS 19.18	1
Spectrometer	Matrix series, Merlin 4 ultra.	1

Industries We Served

Marine & Shipbuilding

Hydraulics & Heavy Engineering

Machinery & Gear Manufacturer

Pumps & Valves

Materials We Work With :

- Gunmetal (Lgl/lg2/ltb2/pbi/cti)
- Bronze (Phosphor Bronze/Aluminium Bronze)
- Brass (High Tensile Brass/Leaded Brass/Naval Brass)
- Quality Assurance

CNC Machine
(BFW Rhino BHT 2025)

VMC Machine
(BFW Sooraj BMV 65 TC24)

Our Products :

Submersible
Pump Bush

Brass Lock Nut

Brass Pump Sleeve

Bronze Impeller

Copper Brass Bush

Copper Rings

Gland Pusher

Bushing
Submersible

Impeller Water
Pump Isolated

Brass Impeller

Centrifugal Die Casting

Our integrated group combines foundry excellence with precision machining expertise to deliver complete non-ferrous component solutions. With advanced casting facilities, conventional and CNC machining units, and strict quality control, we ensure reliability, dimensional accuracy, and cost efficiency at every stage. Built on innovation, craftsmanship, and commitment to excellence, we serve diverse industries with end-to-end manufacturing capabilities that align performance with productivity.
